OUTRAGEOUS

That for years our authorities covered up for traitors is beyond belief. Are we at last going to obtain a "cleaning out" of treacherous bureaucrats?

Manhattan READER

I hope you will continue this expose until the State

Department is truly cleaned up. If we are to continue as a free America we need an enlightened, free and unman-aged press.

Please continue to expose the Reds in our government, so that enough pressure will

be brought to bear to get a full-scale Congressional investigation of the State Department and CIA. Our lives depend on it.

S. GELLINGS

The names of all security risks and traitors in the State Department and CIA should

be immediately announced. It is an outrage that traitors in our government were covered up since 1961, so as not to "discredit" the State Department. A decent man like Otepka was dismissed because he pointed the finger at some of these traitors.
